

From Menaggio to North Lake Como

This itinerary runs along Lake Como's north-western shore through lovely mountain scenery, small fishing villages and along sites of historical and artistic interest. The route follows sections of the former state road 340, now closed to traffic, and some of the new cycle/pedestrian lanes along the lake. It only follows a few sections along the current main road where bikers must pay attention to the heavy traffic. For families we recommend the cycle path from Dongo to Gravedona or from Domaso to Sorico only.

ITINERARY: Menaggio - San Siro - Crema - Pianello del Lario - Dongo - Gravedona ed Uniti - Domaso - Vercana - Gera Lario - Sorico

STARTING POINT: Menaggio, Piazza Garibaldi

LENGTH ONE WAY: 25 km

TOTAL ASCENT: 300 m

TECHNICAL DIFFICULTY: easy

ROUTE: From Menaggio's central square, **Piazza Garibaldi**, follow the long lake side road Via B. Castelli to the Lido, and then continue left along **Via Roma** which comes out onto **Via Diaz**. Continue to the right and at the entrance of the tunnel, take the cycle/pedestrian lane to the right. It ends up onto via Diaz at **Nobiallo**, a typical fishermen's village with its narrow alleyways leading down to the lake. Taking advantage of other three segments of the former state road you reach the commune of San Siro.

On your way you pass **villa la Gaeta**, dominated by the Sasso Rancio cliff. The villa was chosen to shoot the finale for Daniel Craig's first adventure as 007 in Casino Royale. Then follow the main road (as an alternative to the main road you can follow the Antica Strada Regina) for approx. 2.5 km passing through the villages of **Acquaseria and S. Maria** where the beautiful **church of Santa Maria** stands. It was built between 1464 and 1474 to house the Dominicans. Next to the church you can see the ruins of an ancient Roman fortress.

Past the village **Molvedo** take the road (also open to local traffic!) on the right of the tunnel which enters the village of **Rezzonico**. We highly recommend a visit of this charming village with its little picturesque harbor, its arcades and 13th century castle.

From the parking lot just past the castle, enter **Via Statale Vecchia**. After 1.5 km you come out onto the state road which you follow for 800 m.

Once at **San Vito** in the commune of **Crema**, head towards the **church S. Vito**, characterized by two bell towers, and enter the marvelous lake side trail without traffic but shared with pedestrians. You have a marvelous view of Monte Legnone (2610 m), the highest peak of the lake, on the other side of the lake.

You reach **Pianello del Lario** where there is a restaurant and a few cafés. At Pianello del

The cycle path

Lario you can visit the interesting boat museum called **Il Museo della Barca Lariana** (for opening times see www.museobarcalariana.it).

Once you have reached the public boat landing stage of **Musso**, you leave the lake path and head up the steep ramp to the left that ends onto the former state road near the traffic lights. Continue on the former state road (open to local traffic!) and after 600 m at the entrance of the tunnel you turn right to take the passage outside of the tunnel in order to reach Dongo.

At **Dongo** you can visit the '**End of the War**' museum that is located in Palazzo Manzi in Piazza Paracchini. It is connected to the events of April 27, 1945, when Benito Mussolini and some of his ministers were captured on the road between Musso and Dongo by local partisans. For opening times see: <http://www.museofineguerradongo.it/>.

Continue on the state road and just after crossing the bridge over the Albano river, turn right into Via Cimitero and, slightly further, turn left in order to reach the parish church of S. Stefano. Behind the church pick up the cycle/pedestrian lane to **Gravedona**. Just past the lido of Gravedona, turn left and cycle along the Liro river. Cross the bridge and continue along **Via Roma** to the Parish Church of San Vincenzo and the **church of S. Maria del Tiglio**. The latter is one of the most important Romanesque buildings of the province. Built in the 12th century it preserves precious frescoes and a wooden crucifix, a unique example of carved wood from the local Romanesque period.

Follow Gravedona's lake side promenade lined with cafes and restaurants. Head towards **Palazzo Gallio**, a majestic palace with towers and loggia, built in 1582 for Cardinal Tolomeo Gallio.

The lake side road ends onto the state road and immediately past the power plant you turn right in order to pick up the continuation of the cycle/pedestrian lane that leads to **Domaso**. Domaso is an ancient village of Roman origins. For a long time it maintained an economy based primarily on fishing before becoming a tourist resort.

Proceed with caution along the State road 340. After crossing the bridge over the river Livo, turn right into **Via Case Sparse**, which leads to the beach.

The cycle-pedestrian lane that connects Domaso with **Gera Lario** and **Sorico** begins here. You reach the marina of Domaso where the track continues for a short distance next to the state road. You cross

the San Vincenzo river and enter the municipality of **Gera Lario** with its nice marina. Continue along the long lake towards the northern tip of Lake Como, near the mouth of the river Mera. From here you have a beautiful view of the Pian di Spagna, a vast wetland and nature reserve, ideal refuge for local birds and numerous species of migratory birds, another ideal place for cycling and birdwatching. You soon reach Sorico where the route ends.

Possible continuations: cycle paths in Pian di Spagna (various routes in the northern and southern parts), connection with the paths "Sentiero Valtellina" and "Ciclabile Valchiavenna".
